Aspirin 250 mg (NSAID*).....	Pain reliever/fever reducer
Caffeine 65 mg	Pain reliever aid

* nonsteroidal anti-inflammatory drug

Purposes

Uses

- temporarily relieves pain due to: ■ headache ■ muscular aches ■ colds ■ flu
- temporarily reduces fever

Warnings

Reye's syndrome: Children and teenagers who have or are recovering from chicken pox or flu-like symptoms should not use this product. When using this product, if changes in behavior with nausea and vomiting occur, consult a doctor because these symptoms could be an early sign of Reye's syndrome, a rare but serious illness.

Allergy alert: Aspirin may cause a severe allergic reaction which may include:

- hives ■ facial swelling ■ asthma (wheezing) ■ shock

Liver warning: This product contains acetaminophen. Severe liver damage may occur if you take

- more than 8 tablets in 24 hours, which is the maximum daily amount
- with other drugs containing acetaminophen
- 3 or more alcoholic drinks every day while using this product

Stomach bleeding warning: This product contains a nonsteroidal anti-inflammatory drug (NSAID), which may cause severe stomach bleeding. The chance is higher if you ■ are age 60 or older

- have had stomach ulcers or bleeding problems
- take a blood thinning (anticoagulant) or steroid drug
- take other drugs containing prescription or nonprescription NSAIDs (aspirin, ibuprofen, naproxen, or others)
- have 3 or more alcoholic drinks every day while using this product
- take more or for a longer time than directed

Caffeine warning: The recommended dose of this product contains about as much caffeine as a cup of coffee. Limit the use of caffeine-containing medications, foods, or beverages while taking this product because too much caffeine may cause nervousness, irritability, sleeplessness, and, occasionally, rapid heart beat.

Do not use ■ if you have ever had an allergic reaction to any other pain reliever/fever reducer
■ with any other drug containing acetaminophen (prescription or nonprescription). If you are not sure whether a drug contains acetaminophen, ask a doctor or pharmacist.

Ask a doctor before use if ■ stomach bleeding warning applies to you
■ you have a history of stomach problems, such as heartburn
■ you have asthma, high blood pressure, heart disease, liver disease, or kidney disease ■ you are taking a diuretic

Ask a doctor or pharmacist before use if you are taking a prescription drug for diabetes, gout, or arthritis

Stop use and ask a doctor if ■ an allergic reaction occurs. Seek medical help right away.
■ you experience any of the following signs of stomach bleeding:
 ■ feel faint ■ vomit blood ■ have bloody or black stools ■ have stomach pain that does not get better
■ ringing in the ears or loss of hearing occurs ■ pain gets worse or lasts more than 10 days
■ fever gets worse or lasts more than 3 days ■ redness or swelling is present in the painful area
■ any new symptoms appear

If pregnant or breast-feeding, ask a health professional before use. It is especially important not to use aspirin during the last 3 months of pregnancy unless definitely directed to do so by a doctor because it may cause problems in the unborn child or complications during delivery. **Keep out of reach of children.** In case of overdose, get medical help or contact a Poison Control Center right away. Prompt medical attention is critical for adults as well as for children even if you do not notice any signs or symptoms.

Directions

- adults: take 2 tablets every 6 hours, not more than 8 tablets in 24 hours ■ children under 12 years: ask a doctor
